SHIPMENT PRICE/TRANSIT COMPARISON CHART

TERMINOLOGY:

COFC: Container on a Flat Car - A dray provider picks up rail container at origin ramp. Container is taken OTR to shippers dock where it is loaded and returned to the origin ramp to be loaded onto the train. Moves via rail to destination ramp, taken off the train and moved OTR to the consignee then returned empty to the destination ramp.

TOFC: Trailer on a Flat Car - A standard OTR trailer is taken to shippers dock, freight is loaded then taken to the origin ramp. OTR trailer is loaded and secured on flatcar. Trailer moves via rail to the destination ramp. OTR trailer is taken off the rail and then moves OTR to the consignee.
